

## Education looks a bit different these days...

Today's classroom has an altogether different look! In whole or in part, virtual learning has become an integral part of today's educational model. As educators and parents themselves, Mystic Aquarium's team understands the complexities of balancing home schooling and hybrid learning. We are pleased to offer solutions through Mystic Aquarium Digital; an online platform featuring a collection of digital learning tools that give teachers content and technology options while allowing children to learn about our ocean planet.

### Virtual Learning

Bring Aquarium learning into your classroom with our individual class or multi-part virtual programming. Choose from a variety of programs that can be customized to a specific age group.

#### ★ Virtual Individual Class Programs

*Tailored for any age group; 30-40 minutes/program via Zoom*

Program topics include: Aquarium Tour, Penguins Up Close, Seal & Sea Lion Encounter, Career Corner, Beluga Whales, Sharks, Amazing Amphibians and Invertebrate Exploration

#### ★ Multi-Part Programs

*Designed for longer engagement; 4 to 15 hours of program time*

Program topics include: Endangered Species Virtual Adventure (ideal for grades 1-8), Junior Aquarium Careers Virtual Adventure (ideal for grades 1-8), Aquarium Fun (ideal for grades 1-8), Marine Science & Conservation Virtual Adventure (ideal for grades 9-college) and Seminar on Marine Mammals (for college students)

### Smart Social Media

Educational content is the exclusive focus during Facebook and YouTube Lives daily throughout the week. At approximately 10 minutes in length, these presentations can be easily incorporated in a lesson plan or given as homework to encourage students to expand their knowledge by watching after the live segments are recorded and posted on our social media channels.

### Ocean Ambassadors

Encourage your students to get involved by taking conservation action into their own hands. Activities include marine debris removal events, habitat restoration efforts, citizen science activities and more. Each activity can be self-guided or conducted in conjunction with planned Aquarium events.
